

Ace Truck Bodies...

built to go the distance

Ace Truck Bodies lead the way with our innovative design and manufacturing of truck bodies. Each unit is custom-made to your exact specifications and manufactured using the highest quality materials sourced from Australia and around the world.

Our extensive product range suits any size vehicle, and our personalised service and attention to detail means your truck is on the road earning you money in record time.

We offer competitive pricing, fast turnaround and make sure that you are involved in every step. We value our relationship with our customers and ensure that the quality of our units means that they return to us time and again as their needs change and their business grows.

Our custom made truck bodies range in size from utility bodies through to large trucks with a 14-pallet capacity.

We take care of design, manufacturing, refrigeration, insurance quotes, body repairs, modifications and delivery to your door anywhere in Australia.

Each truck body is manufactured in strict adherence to Australian standards for Australian Design Rules (ADR). These standards for vehicle safety, anti-theft and emissions apply to vehicles newly manufactured in Australia or imported as new or second hand vehicles, and supplied to the Australian market.

All our work conforms to Australian health regulations and all Ace Truck Bodies come with a written warranty.

We specialise in:

- Small to large van insulation (Sprinter, HiAce)
- Refrigeration and body packages up to 14 pallets
- Jumbo height bodies
- Multi temperature compartments
- All body repairs (including insurance)
- Eutectic (low temperature) bodies

Brisbane-based Ace Truck Bodies is a wholly Australian owned and operated company. Owner and manager Chris Wilkinson has an outstanding 20 year career history in transport refrigeration. His invaluable industry experience, specialist knowledge and skilled workshop management abilities means that you will always be in good hands.

We employ only qualified motor body builders and service personnel who are experienced in consultancy, technical building and manufacturing.

Contact us today, we'd love to hear from you.

Materials we use

All our bodies are insulated with the highest quality fibreglass panelling incorporating fibreglass H beam ribs and high density polyurethane insulation.

Our panels are machine cut to ensure perfect joint fit, which in turn ensures better insulation.

Polyurethane insulation is water resistant and has the highest thermal properties available on the market today.

- High mechanical strength
- High moisture resistance
- Lightweight
- Long term performance
- Proven solution

What customers are saying about Ace Truck Bodies

"In 2007 we commissioned Ace Truck Bodies to build four custom designed bodies that would allow for the distribution of frozen, refrigerated and ambient product. These bodies needed to be fully HACCP compliant and hold accurate temperatures for up to 10 hours. We have been extremely happy with the bodies built, and have ordered another five. The workmanship is excellent and the expertise and knowledge shown by Chris Wilkinson has proven invaluable."
